IDE Environments

Visual Studio
Adobe Brackets
IDLE Python

Career Objective

I am conscientious and methodical in my work, and thoroughly enjoy innovative and strategic thinking. I am enthusiastic in expanding upon the skills I have acquired in my educational pursuits at both RIC and CCRI. What I lack in experience, I make up for with drive and determination. After taking two additional programming courses my final year at RIC, I developed the passion to learn more. This led me to enrolling in the A.S. Computer Studies and Information program at CCRI. Over the last two years, I diligently worked a full-time quality control position, while taking two classes a semester. This experience has increased my determination, focus, and strength across the discipline immensely. I want to bring that level of fortitude and inquisitiveness to your company, for the growth and performance of your company. and myself, as a programmer. My strong attention to detail and organization skills, paired with the technical, and creative proficiencies I have developed through my studies, make me an asset to your company and strongly align with its mission.

Skills

- Worked on databases in C# through ADO.NET, with the SQL server.
- Created web-based applications with the help ASP.Net in C# in Visual Studio.
- Worked with the Model View Controller in ASP.Net Core.
- Worked with frameworks such as the Entity Framework.
- Proficient at debugging a program to find errors.
- Experience working with JavaScript and a variety of libraries including jQuery.
- Proficient at CSS and HTML, having created websites for both school and freelance jobs.
- Created graphical user interfaces for windows-based applications in C#.
- Published websites in Azure as well as on github.io, and wix.com.
- Experience working on a team to develop a mock product through each stage of its system life cycle.
- Created games in Python with the pygame library.
- Experience creating wireframes, and mock website designs.
- Proficient at creating a variety of graphics and logos in Illustrator and Photoshop.
- Experience creating accessible, and cross-browser compatible websites.
